

Deletion ranges are influence ranges, not confidence intervals; they are not part of the equivalent-specification set and cannot by themselves establish fragility.
Published N = 960; reconstructed N = 1260 (O_A) and 1255 (O_B) bank-years, listwise complete, 1985-1992, from public Call Reports (Chicago Fed archive), FRED CPI and 1983 OMB county lists, rebuilt independently by three implementations that agree at both origins. Two-sided p from conventional WLS; hypothesised direction negative for Model 2 SD and Model 3 SD^2, positive for Model 3 SD.
